

SharePoint Use Disclaimer

The State Oil and Gas Board of Alabama (Board) originally developed and implemented this SharePoint website to serve as a central electronic repository for Board hearing documents to facilitate the staff's review of items on the docket for hearings. Approved notices for publication are posted to the website as they become available. Petitions, affidavits, exhibits, and correspondence are scanned and posted as those documents are submitted by petitioners or other interested parties.

In the interest of providing easier access to these hearings documents in a timely and cost effective manner, the Board has elected to grant access to this site to the public and interested parties. Therefore, hearing documents are now available through SharePoint for the public to review.

The Board makes no representation that the documents accessible through this system are accurate, complete, or current. Parties utilizing this site should do so with the understanding and acceptance of these qualifications. The official records of the Board are available in the Board's offices at 420 Hackberry Lane, Tuscaloosa Alabama. **Therefore, in order to verify that the documents available on SharePoint are current, accurate, and complete, or to obtain more detailed information, you must review the Board's original records and files located in the Board's offices in Walter B. Jones Hall on the campus of the University of Alabama at the above stated address.** Interested parties planning to attend a hearing for a specific docket item should review all of the original records for that item in the hearing files and verify the hearing date and time for that item.
